ABOUT

I'm a web developer with a focus on backend development, specializing in the Java language and using the Spring boot framework and its technologies for the backend and Angular for the frontend.

EDUCATION

- Graduating in Electrical Engineering - Federal University of Paraíba. Start date: 05/2015. 70% of course - Closed
- Graduating in Internet Systems Technology - UNIESP. Expected conclusion: 06/24

PROFESSIONAL EXPERIENCE

Iso Colégio e curso

Position: Educational monitor and substitute teacher

Period 05/2019 - 12/2022
During this period I developed mathematics, physics and logical reasoning activities with high school students and pre-college entrance exam students, during which time I participated in the training and approval of dozens of students in the most competitive courses at several universities in Brazil. I left my job with the intention of improving myself in the field of technology
